***** Nagios *****

Notification Type: PROBLEM

Service: Nginx Check
Host: Remote Ubuntu Server
Address: 172.31.15.137
State: CRITICAL

Date/Time: Thu Sep 10 05:07:51 UTC 2026

Additional Info:
CRITICAL: nginx is stopped (should be running)

There we go, got the notification of confirmation of hard state as the counter reached 3

Got the recovery notification as well after the fix

09-10-2026 08:03:59	(Nagios Process)	Notifications for this service are being suppressed because it was detected as having been flapping between different states (22.9% change >= 20.0% threshold). When the service state stabilizes and the flapping stops, notifications will be re-enabled.	2	No	Flap Detection	N/A	

Key Concept: Nginx was recovered successfully and HTTP returned 200 OK. Nagios detected flapping because the service changed states repeatedly during testing, so notifications are temporarily suppressed until the service stabilizes.

Application Validation:

```
ubuntu@nagios-mastery: ~
GNU nano 6.2 /usr/local/nagios/libexec/check_web_app.py
#!/usr/bin/env python3

import sys
import requests

if len(sys.argv)!=2:
    print("UNKNOWN: Usage: check_web_app.py <URL>")
    sys.exit(3)

url = sys.argv[1]

try:
    response = requests.get(url,timeout=10)

    if response.status_code != 200:
        print(f"CRITICAL: Application returned HTTP: {response.status_code}")
        sys.exit(2)

    try:
        data = response.json()

Note: 3/3 checks done, entered Hard state and notification sent

Let's do the recovery now (the actual DB simulation would be my next flagship practical)

And there we go, got it done

Nginx Log Monitoring Using NCPA Custom Plugins

```
ubuntu@ncpa-agent: ~  
GNU nano 6.2 /usr/local/ncpa/plugins/check_nginx_logs.sh  
#!/bin/bash  
  
LOG="/var/log/nginx/error.log"  
WARNING=5  
CRITICAL=5  
  
if [ ! -f $LOG ]; then  
    "UNKNOWN: Nginx error log not found"  
    exit 3  
fi  
  
ERROR=$(tail -n 100 "$LOG" | grep -c "\[error\]")  
  
if [ "$ERROR" -ge "$CRITICAL" ]; then  
    echo "CRITICAL: $ERROR errors found in recent logs"  
    exit 2  
  
elif [ "$ERROR" -ge "$WARNING" ]; then  
    echo "WARNING: $ERROR errors found in recent logs"  
    exit 1
